

AWOC Winter 2010/2011 Development Plans

AWOC winter is a comprehensive course devoted to winter weather warning decision making. It has online lessons, exercises, assignments, an end of course simulation, and even one Instructional Component that can be treated as its own course (IC3). WDTB has decided to give you several course taking options in the give you the option of several development plans within the [NWS LMS](#). Called Development Plans, we list three of them below. Each plan is headlined by a hypothetical forecaster situation. Choose the development plan that best fits your situation and motivations. These are listed in the table below:

Development Plan in the LMS	Target audience	notes
WDTB AWOC Winter FY2011 Standard	➤ Interested forecasters, and DLOC 2010/2011 graduates.	➤ IC's 1-7, IC8.1 WES simulation ➤ End of course test
WDTB AWOC Winter FY2011 Platinum	➤ Forecasters that have not taken AWOC winter ➤ DLOC 2008/2009 graduates	➤ All lessons in the standard version plus: ○ IC4.2 & IC4.3 exercises ○ IC8.2 WES simulation
WDTB FY2011 Road Weather Course	➤ Forecasters interested in learning about road weather	➤ IC 3

The figure below represents the development plans within the LMS.

Additional notes:

You may create a development plan that involves all or any part AWOC winter. We suggest you peruse the lessons and their descriptions in the [lessons](#) page. We suggest that [IC3](#) be taken in its entirety within any development plan.

Students completing the platinum version of AWOC winter will receive a special certificate and recognition for having gone through a more rigorous version of the course. The platinum
